Macy's Vendor Direct

General

Visit our vendor website, <http://fdsnet.com/NewUser>, to view these important documents:

- Macy's current Vendor Standard Manual
- Macy's general terms and conditions
- Macy's corporate transportation routing guide
- Return to <http://fdsnet.com/NewUser> to register account and email addresses once you become a Macy's vendor.
- Complete the EDI Startup form to begin testing of the following EDI documents required by Macy's: Invoice (810), Electronic Remittance Advice (820), Product Catalogue (832), Inventory Advice (846), Purchase Order (850) and Advance Ship Notice (856).

Universal Product Code (U.P.C.), International Article Number (EAN) and Global Trade Identification Number (GTIN)

- You are a member of the Uniform Code Council (UCC) and have a UCC Block ID(s).
- You assign U.P.C. numbers for all your merchandise at the unique item (size & color) level, using the National Retail Federation (NRF) size & color codes.
- You assign U.P.C.s on a timely and accurate basis, and they are loaded into the Inovis U.P.C. Catalogue™.
- You ticket 100% of your merchandise with industry standard vendor generated quality U.P.C. barcodes affixed securely to your merchandise.
- Your printed and electronic media matches. Your line lists, printed catalog, U.P.C. tickets and Inovis U.P.C. Catalogue must all match.

Electronic Data Interchange (EDI)

- You are using the most current EDI Mapping Standards.
- You are sending Macy's timely and accurate Inventory Inquiry/Advice documents (846), EDI invoices (810) and Advance Ship Notices (856).
- You are receiving Macy's EDI Purchase Orders (850) and Remittance Advice (820).

Packing

- Prepare a branded customer invoice.
- Support for all online channels.
- Extended support for optional gift message.

Following are the Inovis solutions for the above Macy's EDI and U.P.C. requirements:

TrustedLink® converts your internal application data formats to and from EDI, and then translates that information into a format your business partners can view.

BizManager™ is the most comprehensive B2B Gateway solution available for messaging, mapping, transformation, trading partner community management, tracking and auditing. Web-based, it leverages the latest industry standards and provides for direct, secure data exchange.

Web Forms™ is a tool that provides workflow processes and data translation services for small and mid-size companies to electronically exchange documents.

Inovisworks™ is an electronic mailbox service that accommodates information from standard EDI to proprietary data formats.

Inovis Catalogue™ synchronizes product and price information with the entire global retail industry through one central application.
